EDUCATION

University Of California, Irvine

Irvine, CA

B.S Computer Science (AI/Intelligent Systems specialization)—GPA: 3.824/4.0

Jun. 2028

Relevant Courses: Data Structures and Algorithms, Computer Organization, Intro to Artificial Intelligence, Machine Learning/Data Mining, Operating Systems, Information Retrieval, Intermediate Python Programming, Programming with C++, Linear Algebra, Calculus

Activities: Learning Assistant for ICS 6D-Discrete Math, Communications Chair for AI @ UCI

EXPERIENCE

Incoming AI/ML Software Engineering Intern

Jun. 2026 – Sept. 2026

F5 Networks

San Jose, CA

- Rolling out Gemini Enterprise, developing features for the internal AI Hub, and building agentic AI workflows to support engineering teams across the organization

Software Engineering Intern (iOS)

Jun. 2025 – Sept. 2025

GoodRx

Santa Monica, CA

- Engineered a dynamic native screen in Swift using Xcode, that queried privacy policy information from Contentful and mutated user-submitted form data using GraphQL; optimized the front-end iOS mobile application data retrievals to reduce manual update overhead with the legal team by ~40%
- Shipped 5+ native screens, collaborating with product managers, designers, and team members to implement changes and improve experiences for thousands of users
- Redesigned main app splash screen under tight deadline for ~20k users

Artificial Intelligence Engineering Intern

Dec. 2025 – Present

Bizdata Inc.

Remote

- Built an MCP server using SambaNova's gpt-oss-120b model to expose and call on 3+ API tools
- Creating an autonomous agent to execute tools via the MCP server with structured output parsing, retry logic, and error recovery

Research Assistant

Nov. 2025 – Present

University of California, Irvine (UCI)-ARCALA Lab

Irvine, CA

- Recruited ~50 students and prepared materials for an upcoming study on AI tool usage in novice CS concepts
- Conduct statistical analysis of qualitative code involving the categorization of a custom LLM built to encourage cognitive action in undergraduate students.
- Assisted with guardrails testing for custom GPT model.

Research Assistant

Mar. 2023 – Nov. 2023

Carnegie Mellon University-McLaren Lab

Remote

- Conducted qualitative coding of the self-feedback for 2000+ samples of ChatGPT's responses for a study on the potential of the use of AI in learning games
- Published in acknowledgments of EC-TEL 2023's Best Paper
- Regularly conducted testing of lab's learning games such as "Decimal Point" and "War at Sea" to detect bugs before studies

PROJECTS

HeartToMom | *Gemini API, React+Vite, Supabase, Vercel*

May. 2026

- Developed a full-stack website to conduct a risk analysis on cardiovascular disease and 5 other high impact diseases in pregnant women to reduce mortality rates
- Implemented an AI RAG Chatbot by creating a local knowledge base with 15+ chunks, and used AI to calculate a risk score for the user alongside 3 others for VenusHacks 2026

Raspberry Pi 3B+ Motion Detector | *Raspberry Pi 3B+, Raspberry Pi Camera, OpenCV, MediaPipe*

May. 2026

- Developed a real-time motion detection pipeline using OpenCV on a Raspberry Pi 3B+, processing 640x480 video with 70 ms frame-processing latency and live object bounding-box visualization

MealIdeas | *PyTorch, React+Vite, Flask, Foodish API*

Oct. 2025

- Developed a fullstack website that uses an API to generate random images of food for meal prepping and ideas

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL, Swift, HTML, CSS, JavaScript

Frameworks/Packages: SwiftUI, MediaPipe, OpenCV, NumPy, scikit-learn, PyTorch, React+Vite, Flask

Developer Tools: VS Code, Cursor, Claude Code, Gemini API, Antigravity, Google AI Studio, Git, Figma, Supabase, Xcode, Vercel, Docker, Jira, GraphQL, Apollo Studio, DataDog, Contentful, Optimizely

Certificate(s): LinkedIn Learning: Artificial Intelligence Foundations: Machine Learning
